

## **Possible Questions:**

You may choose one of these questions or write your own to be approved by your teacher.

### Loss of biodiversity

1. Is it essential to protect bee populations that are in decline?
2. Overfishing is depleting the ocean and upsetting aquatic ecosystems
3. Kangaroo meat should be our major meat source not traditional meats such as beef, pork and lamb.

### Plastics

1. Why should humans reduce the amount of plastic they use?
2. Why should we be testing for Microplastics in food?
3. The government needs to regulate the labelling of plastic products to make it clear to consumers the type of plastic (degradable vs biodegradable)

### Water management

1. Water restrictions are unnecessary and should not be reintroduced in NSW.
2. Better forms of irrigation need to be utilised in farming.
3. Farmers should be switching to more drought tolerant crops or native crops to help reduce water reliance.

### Ozone depletion

1. Should the amount CFC's (Chlorofluorocarbons) in the air be monitored?
2. Should humans stop using aerosol cans?
3. Do we even need to monitor the ozone layer anymore?

### Waste management

1. Should humans reduce the amount of waste they produce?
2. Are three waste bins at a house in NSW necessary?
3. Should local councils provide more initiatives to households to live more sustainably?
